U.S. Navy veteran
University of California, Davis,
computer science

Priscilla Ng
California Polytechnic State
University, San Luis Obispo,
mechanical engineering

Carlos Alberto Farías
University of California, Berkeley,
nuclear engineering

At PG&E we believe in the power that education has in strengthening a community. To give our next generation of Californians more opportunities to learn and succeed in higher education, PG&E is awarding scholarships to help further the STEM studies of local students throughout our service territory.

Each year, PG&E awards scholarships of \$2,000 to \$20,000. This program is open to all students pursuing a STEM field. High school seniors, current college students, veterans and adults returning to school are encouraged to apply.

Eligible students will be evaluated based on demonstration of community leadership, personal triumph, financial need and academic achievement.
